

III CONGRESS OF THE BRAZILIAN ASSOCIATION OF PHARMACEUTICAL SCIENCES

Plaza São Rafael Hotel – Porto Alegre – RS – Brazil

June 13-15, 2016

Frontiers of Pharmaceutical
Sciences in the Omics Era

Abstract deadline: March 11, 2016

From October 19, 2015

<http://www.congressoabcf.eventize.com.br/>

Frontiers of Pharmaceutical Sciences in the Omics Era is the theme of the III Congress of the Brazilian Association of Pharmaceutical Sciences – ABCF. The event will cover different aspects of the study of proteins, peptides, genes and metabolites in living organisms. The Scientific Program will be versatile, attempting to attract scientists from all areas of pharmaceutical sciences. The activities will include conferences, thematic sections, mini-courses, coordinated sections and ABCF Young Investigator Award Presentations. Thematic sections and conferences will focus on peptide and protein delivery, diagnostics, metabolomics and proteomics, epigenomics, tissue imaging, nanomedicine, new bioactive natural products, ethnomedicine, PK/PD modeling, neglected and emerging infectious diseases, vaccines, bioequivalence of biotech drugs, alternative methods for cosmetics and drug analysis, and pharmaceutical care.
